4 REASONS TO BELIEVE

Why Upgrade to SYSPRO 8?

SYSPRO ERP is a continually evolving solution and, with the integration of proven powerful new features in our latest release, SYSPRO 8, SYSPRO is paving the way towards digitalization. These features include; actionable business insights; social media as a collaboration tool; exciting new IT capabilities and functions such as universal social media-type interfaces and platforms across all devices; and the flexibility to deploy on-premise, in the cloud, or both.

And rest assured, as new technologies emerge that redefine the way businesses work, SYSPRO will be at the forefront of helping you embrace and take full advantage of them.

Easier to Access and Use

1

SYSPRO's Web Interface, SYSPRO Avanti, Provides Universal Access

- Work where and when you want to. SYSPRO Avanti, SYSPRO's web-based user interface, allows you to access the same SYSPRO through a web browser on any device, on any platform, from anywhere, at any time. It is available to anyone who has installed SYSPRO 8, whether on-premise, in the cloud or both (hybrid). This choice provides you with the ability to select the best UI for the specific task at hand. SYSPRO Avanti is included in your annual license fee and is therefore available at no extra cost. Your ERP, your way, on your terms.

Personalize Your Workspace

- Users now have access to a single, customizable and personalized workspace within SYSPRO. SYSPRO 8 provides you with the flexibility to personalize your workspace without getting development involved. It is intuitive and easy-to-use, providing you with a simplified, engaging and rewarding experience.
- You are able to design role-based workspaces, providing users with the complete tools and information needed to perform their role efficiently and effectively, displaying aspects most relevant to a user's touch points with actionable insights only one click away.

Empower Users with Actionable Insights

- Business Insights provides the flexibility for you to define operational goals, targets and deadlines at an individual, role or organizational level, empowering users to perform to their full potential.
- With live, real-time surfacing of data and metrics, users at all levels throughout your organization are able to monitor their performance daily against their own KPIs and manage their own work-lists accordingly.

Improve Internal Collaboration

- Improve collaboration and seamless connectivity across the entire organization by embedding a familiar, social media-like appearance. SYSPRO Harmony, a social ERP collaboration tool, is user-friendly and provides a social platform that users can interact with, providing an ecosystem of collaboration in which to conduct their daily business. Now SYSPRO Harmony allows you to surface trends and customer sentiments for increased insight by using intelligent machine learning algorithms and predictive analytics to make sense of your data.

Improved Efficiencies and Productivity

Optimize Use of Your Resources

- Reduce wastage and optimize raw material usage with Job Nesting. By providing the ability to nest multiple jobs, utilizing the same raw material or components, wastage is reduced and raw material usage is optimized, lowering the cost of operations.
- Eliminate the necessity for dual capture and reduce errors typically caused by manual data capture by transacting directly on the shop floor. Espresso Shop Floor Data Collection provides a mobile solution for capturing all production related transactions directly on the shop floor through the use of live mobile devices.
- Minimize loss, increase productivity and lower production costs with SYSPRO's Manufacturing Operations Management. This Manufacturing Execution System (MES) provides complete manufacturing lifecycle management from planning to scheduling, publishing, collecting, tracking and analysing – to optimize the use of resources and improve end-to-end manufacturing operations.

Drive Performance Measures

- Get real-time insight into key performance information and the means to act quickly and proactively with Business Insights. It provides greater control through a real-time view of the performance of the company by individual and department across the entire operation with actionable insight, thereby increasing your decision-making ability.
- Drive world-class standards of operations for overall equipment effectiveness (OEE), total effective equipment performance (TEEP) and overall labor effectiveness (OLE) with SYSPRO Manufacturing Operations Management, a complete Manufacturing Execution System for your production needs.

Improve Traceability

- Improved Bins to Serial Linking provides an enhanced method of tracking serial numbers linked to bin locations for better visibility and management of serialized stock items in specific warehouses.

Simpler to Manage, Maintain and Run

3

Do More Faster, with Extended System Availability

- In SYSPRO 8 our architecture has been refined for improved leveraging of Microsoft SQL Server, delivering up to 30% improvement in overall performance and scalability.
- Reduce your planned downtime by taking advantage of re-engineered month-end and balance functions that now take from minutes to seconds to complete where previously it could have taken hours.
- Customers still on a CISAM database now have the choice to migrate to SQL Server on-premise or SQL Azure in the cloud. This choice gives organizations the ability to purchase SQL outright or to store relational data in the cloud and pay based on consumption.

Easily Upgrade when it Best Suits You

- SYSPRO 8 has introduced new deployment and ongoing management techniques. We will be releasing updates to SYSPRO 8 three times a year. This allows us to release enhancements based on our commitment to the published roadmap. In addition, hotfixes are supplied during a release to correct issues without you having to install unnecessary software. This enables customers with strict acceptance criteria to plan a controlled rollout with no surprises.

Maximize Collaboration between SYSPRO and External Systems

- SYSPRO 8 introduces the concept of Open Reporting API. This provides you with the ability to generate SYSPRO documents from external systems via a published API (Integration). This new capability enhances the automation of document processing between B2B, B2C (Business to Consumer), and S2S (System to System).

Simply and Effortlessly Administer and Maintain Your SYSPRO Data

- Get one view of your system with an Administration Dashboard providing insights, notifications and alerts as to the health of your system.
- Ensure data integrity. The Administration Dashboard additionally validates and confirms the integrity and consistency of your data with the SQL Health Check and insights.

Did You Know...

Your upgrade software is included in your Annual License Fee!

Offers New Capabilities

For Manufacturing:

- **SYSPRO's Manufacturing Operations Management** solution helps manufacturers:
 - Measure performance to drive world-class standards of operation for overall equipment effectiveness (OEE), total effective equipment performance (TEEP) and overall labor effectiveness (OLE)
 - Increase productivity and lower costs by minimizing loss within the business
 - Optimize operational efficiencies through better workflow of core manufacturing activities: schedule, publish, collect, track, analyze and improve
 - Connect machines and other devices to digitize the factory and gain a competitive advantage.
- **Job Nesting:** Reduce wastage and optimize raw material usage with Job Nesting. By providing the ability to nest multiple jobs, utilizing the same raw material or components, wastage is reduced and raw material usage is optimized, lowering the cost of operations.
- **Shop Floor Data Collection:** Eliminate the necessity for dual capture and reduce errors typically caused by manual data capture by transacting directly on the shop floor. Espresso Shop Floor Data Collection provides a mobile solution for capturing all production-related transactions directly on the shop floor through the use of live mobile devices.

For Distribution:

- **Preferred Supplier:** Mitigate purchasing risks, improve purchasing governance and buy products and services at the best value-to-price ratio by establishing and managing strategic sourcing policies in SYSPRO's Preferred Supplier feature. It optimizes the management of sourcing strategies for materials and for the recommended selection of suppliers during your purchasing cycle.
- **WMS Picking:** Improve order fulfilment and increase your picking accuracies by making use of the WMS Picking capabilities. By providing picking routines such as batch picks, wave picks, order picks or batching of transactions based on locality, order book fulfilment is improved. You can co-ordinate team picking to reduce cycle time for larger orders and utilize work-to-lists to provide clear visibility as to resource demands by function, locality and other requirements.

For Finance:

- **Budget Control and Corporate Performance Management:** Get greater visibility into your company's financial health, improving profitability and minimizing risk. Prophix Corporate Performance Management (CPM) for SYSPRO enables you to automate the management of your budget cycle, providing financial consolidation and reporting, financial analysis, modeling and planning.
- **Dunning Credit Management:** Reduce risk and improve your collections with Dunning Credit Management, providing the credit department with enhanced management, control and reporting tools in regards to collections.
- **Multi-Currency:** With improved multi-currency support, you are able to transact in multiple currencies against any debtors and creditors irrespective of their default currency setting.
