Executive Summary

This roadmap has been developed to

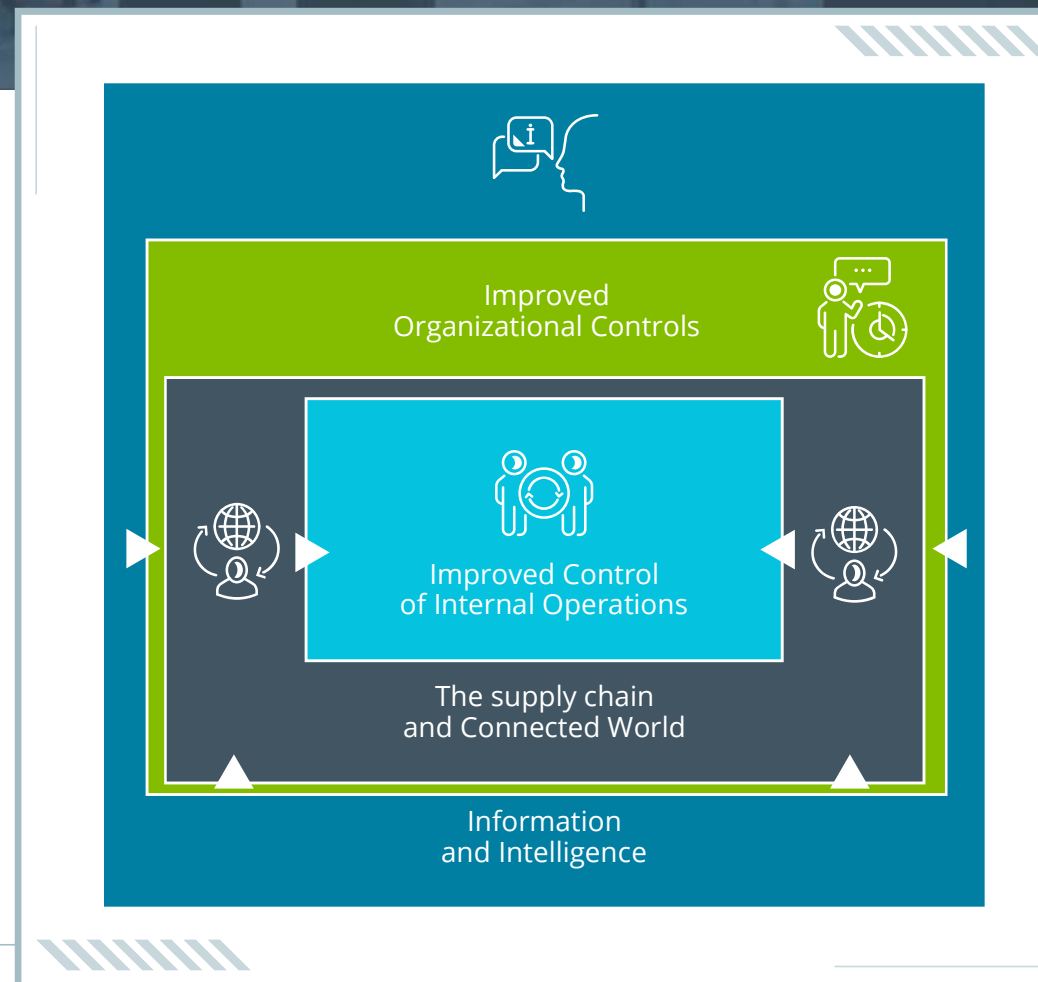

- Take the SYSPRO customer into the near future with all of the capabilities required to be competitive in the future, and
- Develop the Digital Transformation necessary for a manufacturing business to extend that competitiveness.

There are a few key themes that remain at the centre of the product direction which are presented here.

SYSPRO's view of Business Systems into the future: Business Transformation

The symbiotic, 4 roadmap themes driving Business Transformation

Improved Control of Internal Operations

Warehouse and Logistics
Management

Operations
Management

Quality
Management

Enterprise Asset
Management

Mobility

1

Operations Management

Focus is on improved customer flexibility during order placing, material management in the supply chain, better control of sub-contract engagements and expanded project controls to improve factory throughput, accuracy of job completion dates and cost reduction.

The initial focus areas are:

Product Configurator

Replenishment
Methods

Sub-Contract
Management

Work Breakdown
Structures

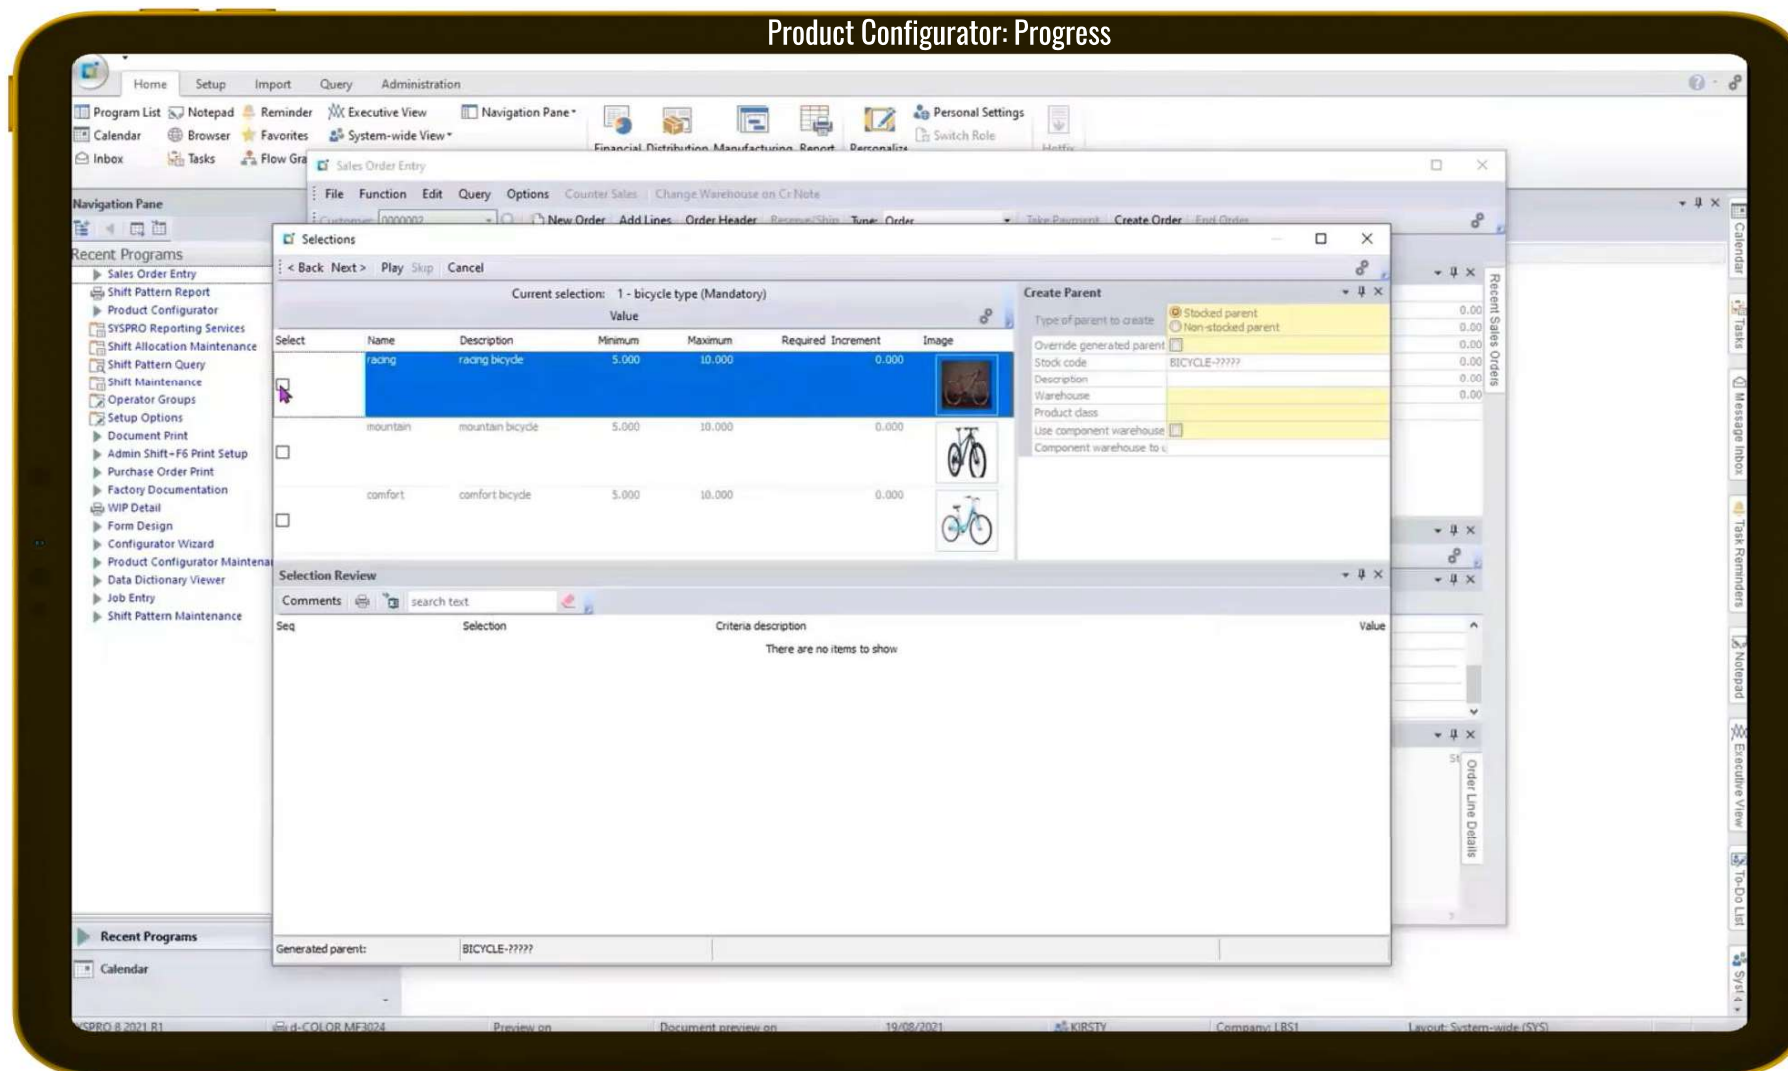

Operations Management

Availability

Capability	Prioritized	Planned	Futures
Product Configurator	2022-R1		
Replenishment Methods		2023	
Sub-Contract Management		2023	
Production Projects – Work Breakdown Structure			2023+

Enterprise
Management

Enterprise Management

As part of SYSPRO's journey with our customers, we are often fortunate to see how they grow and evolve. Very often this means becoming part of a group of companies that may be spread across the globe. SYSPRO's Enterprise Management capabilities will focus on strengthening our support for multi-company groups.
